

## Even Out

# Product Data Sheet

### SOLVENT FREE COLOR RESTORING SEALER FOR GROUT

#### BENEFITS:

- Restores color to “washed out” grout
- Provides excellent water repellency and unmatched stain repellency
- Formulated to eliminate blotchiness and shading, restoring color on all cement based grouts
- 20 year UV and stain resistance
- Physically and chemically bonds
- Vapor permeable; won’t crack, peel or blister
- Non-flammable – flash point >200 F
- Interior and exterior applications

**DESCRIPTION:** VanHearron, Inc.’s Even Out is an innovative low VOC sealer and color restorer for all cement based grouts. Even Out is specifically formulated to restore washed out or blotchy grout to its original color.

**USES:** Can be used on all cement based grouts.

**ADVANTAGES:** Even Out provides excellent water and stain repellency for interior and exterior applications. It contains a fluoropolymer that gives the surface excellent resistance to water and oil based stains. Even Out bonds both physically and chemically to the grout surface for long lasting protection and appearance. Even Out is vapor permeable so it won’t crack, blister or peel. 100% active solution reduces the amount of product needed.

**LIMITATIONS:** Even Out is to be used on cement based grouts ONLY. Even Out should not be used on grout joints around unsealed natural stone as the product will enhance the color of the stone and could create a “picture frame” on the edges of the stone.

**SURFACE PREPARATION:** Surfaces should be clean from dust, dirt, oils, greases, cutting compounds, other coatings, efflorescence and laitance before applying Even Out. It is recommended the surface be cleaned prior to application with VanHearron’s Haze Away.

**APPLICATION:** **Read entire label before using. Use only as directed.** Before applying, preliminary test should be carried out in a small inconspicuous area to determine ease of application and desired results. Apply solution, as supplied, to the surface using the roller tip provided, a soft lint free cloth, sponge, or microfiber pad. Apply 1 to 2 coats, waiting 5 minutes between coats. After application, allow product to dwell 10 minutes on surface and buff dry with a clean lint free cloth. All product must be removed from surface after dwell

time. Even Out should be fully cured within 24 hours. Thoroughly rinse application equipment with a light duty solvent.

**CAUTIONS:** **Do not dilute or alter.** Protect from freezing. Do not apply product by spraying. Protect all adjacent surfaces from accidental contamination. Dispose of unwanted material according to state and federal regulations.

*Keep out of reach of children.* Should not be taken internally. It is good practice to always wear protective clothing, gloves, and eye protection when handling sealants. In the event of eye contact, continuously rinse eyes for a minimum of 15 minutes. If irritation persists, seek medical attention.

**COVERAGE:** Approximately 200 – 2000 square feet per application per 8 oz. bottle, depending on tile size, grout joint width, and desired finish.

**STORAGE:** Unopened, Even Out has a one year shelf life. Even Out must be stored in tightly closed containers, protected from sunlight, at temperatures between 32 F and 100 F.

**AVAILABILITY:** VanHearron’s Even Out is available in 8 oz. bottles with easy to use applicator.

Melting Point/melting range: Not applicable  
Flash point: .94C (.201F)  
Ignition temperature: Not determined  
Lower explosion limit (LEL): Not determined  
Upper explosion limit (UEL): Not determined  
Vapour pressure: Not applicable  
Density: 1.03 g/cm<sup>3</sup> at 25C (77F)  
Water solubility/ miscibility: Insoluble  
pH-Value : Not applicable  
Viscosity (dynamic): 100mPa.s at 25C (77F)

VanHearron's state-of-the-art protective treatments have developed a reputation among architects and design professionals as the premier solution for construction chemicals. VanHearron, Inc. is dedicated to solving the destructive influence water intrusion and other elements have on tile and natural surface

*Technical service engineers and chemists are available to answer questions on product performance, application methods and chemical composition.*
