

InHance (once and done)

Product Data Sheet

EXCELLENT COLOR ENHANCEMENT AND UV STABILITY

BENEFITS:

- Seals and enhances in one application
- Rich color enhancement
- Excellent stain and water repellency
- Low VOC, non-flammable
- 15 year protection
- Interior and exterior use

DESCRIPTION: VanHearron's InHance (once and done) is an excellent green, low VOC solvent based sealer formulated to protect and highlight the character and beauty of unsealed natural stone, terracotta and masonry. It rejuvenates the color and improves the appearance of worn and weathered stone. An invisible barrier is formed that resists water, grease, oils, stains and dirt. InHance (once and done) allows moisture-vapor transmission.

USES: Use on unsealed natural stone, terracotta tiles, unglazed ceramic tile, unglazed porcelain, fabricated stones, grout and masonry.

ADVANTAGES: Effective for interior and exterior applications. Works on most porous architectural substrates. Provides a fast drying, long lasting resistance to water and stains, salt, oil, food and more. Creates joint stability. InHance (once and done) is breathable but resists efflorescence.

LIMITATIONS: Do not allow sealer to come into contact with any non-recommended surface, as **product is not completely removable**. Sealers and finishers should not be used before or after use of InHance (once and done). **If InHance (once and done) is not wiped completely dry within 5 minutes, a residue may form.** If residue occurs, use a scrub brush with alcohol to remove. Keep floor surfaces dry and clean to reduce possibility of slip-fall accidents.

APPLICATION: **Read entire label before using. Use only as directed.** Surface must be clean, dry, and free of any sealers or coatings. Apply using a sponge, paint pad or cotton towel. **Again, if any sealer does not penetrate the surface, it MUST BE polished dry from the surface within 5 minutes of application, using an absorbent cotton or paper towels.** If two or more coats are applied, allow a minimum of 30 minutes drying time between coats. Ready for surface traffic in 12 hours after final coat. Keep dry for 12 hours. Achieves full cure in 48 hours. Some highly porous surfaces may require an additional coat after full cure. Clean application tools with mineral spirits after each use.

EXPECTED WEAR: Wear will vary from application to application and is affected by a number of factors including surface texture and hardness, traffic, weather conditions, and routine pressure washing. (Sealer will not prevent surface wear or washing from acids or caustic chemicals.) InHance (once and done) can be expected to last up to 15 years on interior applications and up to 7 years on exterior applications.

WARNING: *Keep out of reach of children.* Once enhanced, surface cannot be restored to original color appearance. Use in well-ventilated areas. Avoid

prolonged skin contact. Always wear protective clothing, gloves and eye protection during application of InHance (once and done). **May be harmful if swallowed. May irritate eyes and skin.**

FIRST AID: If ingested: If person is conscious, immediately give two glasses of water and induce vomiting. Seek medical attention. **Eye contact:** Continuously flush eyes for a minimum of 15 minutes. If irritation persists, seek medical attention. **Skin Contact:** Wash with soap and water. If irritation persists, seek medical attention. **Inhalation:** Relocate to fresh air. If symptoms persist, seek medical attention.

COVERAGE: Approximately 500 to 1500 square feet per gallon, per coat, depending on type of surface, porosity, texture, temperature, humidity, and method of application.

HANDLING AND STORAGE: Use and store between 40 F and 90 F (4 C and 32 C). Store in original container only. Close securely after each use. Unused product is freeze-thaw stable. Dispose of residue or any unused leftover product in accordance with applicable federal, state, and local requirements.

AVAILABILITY: VanHearron's InHance (once and done) is available in 1 gallon bottles and 5 gallon pails.

PHYSICAL STATE: Liquid
ODOR: Aromatic
ODOR THRESHOLD: Not Available
pH: Not Available
MELTING POINT: Not Available
BOILING POINT RANGE: Not Applicable, will decompose first
FLASH POINT: 50oF
EVAPORATION RATE: Not Available
FLAMMABILITY(solid/gas): Not Available
EXPLOSION LIMITS:
UPPER: Not Available
LOWER : Not Available
VAPOR PRESSURE: Decamethylcyclopentasiloxane: 0.12kPa @ 25C
VAPOR DENSITY: Not Available
RELATIVE DENSITY: 1.0 g/mL
SOLUBILITY: Not soluble in water
PARTITION COEFFICIENT: N-OCTANOL/WATER: Not Available
AUTO-IGNITION TEMPERATURE: Not Available
DECOMPOSITION TEMPERATURE: >150oC
VISCOSITY: 30 cS

VanHearron's state-of-the-art protective treatments have developed a reputation among architects and design professionals as the premier solution for construction chemicals. VanHearron, Inc. is dedicated to solving the destructive influence water intrusion and other elements have on tile and natural surfaces.

Technical service engineers and chemists are available to answer questions on product performance, application methods and chemical composition.

Disclaimer/Warranties: 100% satisfaction guaranteed when used as directed. Contact VanHearron for exclusive remedy or either refund of purchase price or replacement of product. Proof of purchase within one year of purchase required. Neither manufacturer nor seller have any knowledge or control concerning the purchaser's use of the product.
