

## Poultice Stain Remover

### Product Data Sheet

#### PROFESSIONAL GRADE STAIN REMOVER

##### BENEFITS:

- Highly effective multi-purpose formulation
- Absorptive clay and fine abrasive powder
- Non-toxic, non-flammable
- VOC compliant, biodegradable
- Contains baking soda to help eliminate odors
- Interior and exterior applications

**DESCRIPTION:** Poultice Stain Remover is a powder mix that pulls out deep-set, below surface stains. This natural absorptive clay mixture is formulated to draw stains out of the surface, but is also an excellent fine abrasive powder to scrub away surface stains. Poultice Stain Remover can also be added to other cleaners to “boost” their effectiveness.

**USES:** Poultice Stain Remover is perfect for removing deep set stains and surface stains in natural stones such as marble, granite, slate, sandstone, travertine, and limestone. It is also effective on unglazed porcelain, terracotta and grout. Mix to use on horizontal and vertical surfaces. Poultice Stain Remover can be mixed with Mighty Indigo instead of water with remarkable results. May be used indoors and outdoors.

**CAUTION:** **Protect from freezing.** *Keep out of reach of children.* Do not take internally. It is good practice to always wear protective clothing, gloves and eye protection when using cleaning products. Avoid prolonged contact with aluminum or magnesium as minor corrosion may result.

**COVERAGE:** One 12 oz. jar of Poultice Stain Remover covers approximately 25 to 75 square feet, depending on the type of surface, porosity, texture, temperature, and method of application.

**Read entire label before using. Use only as directed.**

##### **APPLICATION for deep set stains:**

Mix Poultice Stain Remover with water to form a thick paste. Apply Poultice Stain Remover paste approximately ¼” thick to

stained surface. Allow paste to extend beyond the edges of the stain by at least 1”. Cover paste with plastic and tape edges of plastic to surface with painter’s-type tape. After allowing the paste to dwell on surface under plastic for 24 to 48 hours, remove the plastic covering. Remove paste with a non-marring tool, such as a plastic putty knife. After the paste has been removed, clean surface with a sponge or a white cotton or microfiber towel and water. Thoroughly rinse surface with water and dry with a white cotton or microfiber towel. A wet/dry vacuum may also be used. Some stains may require two or more applications. If surface is to be sealed, allow 24 hours drying time prior to applying sealer.

##### **APPLICATION for surface stains:**

Apply a small amount of water to surface to be cleaned. Liberally sprinkle Poultice Stain Remover to the wet surface and mix into a thin slurry. Scrub surface with a nylon scrub pad or other comparable non-marring scrubbing tool until stain is removed from surface. After stain has been removed, clean solution from surface with a sponge or a white cotton or microfiber towel and water. A wet/dry vacuum may also be used. Thoroughly rinse surface with clean water and dry with a white cotton or microfiber towel. Some stains may require two or more applications. If surface is to be sealer, allow 24 hours drying time prior to applying sealer.

**\*For large stained surfaces,** a low RPM (300-750RPM) buffer can be used with a white nylon pad to remove stains. Keep surface wet during buffing process.

**\*For vertical surfaces**, mix Poultrice Stain Remover with water into a slurry *in a container*, then apply to the wet surface.

COMPLIANCE AND HANDLING: Complies with all federal, state, and local VOC regulatory requirements. Use and store between 40 F and 100 F, in original container. Close after each use. When stored properly, minimum shelf life is 1 year.

WARNING: May be harmful if swallowed. It is good practice to always wear protective clothing, gloves, and eye protection when using cleaning solutions. May irritate eyes and skin. If product gets in eyes, flush with water for at least 15 minutes. If product gets on skin, wash with soap and water. If irritation persists, seek medical attention. If swallowed, DO NOT induce vomiting. Immediately seek medical attention.

AVAILABILITY: Poultrice Stain Remover is available in 12 oz. jars.

APPEARANCE:	Powder
COLOR:	White
ODOR:	No Odor
PHYSICAL STATE	Solid
pH (TYPICAL):	Not Applicable
