

Weekly Shower Treatment

Product Data Sheet

PREVENTS WATER SPOTS WITH REGULAR USE

BENEFITS:

- Hydrophilic treatment “sheets” water to the drain
- Eliminates soap scum buildup
- No change in surface appearance
- Prevents water spots
- Reduces calcium and mineral deposits

DESCRIPTION: Weekly Shower Treatment is a specially formulated treatment for all surfaces inside the shower. It is safe on any tile, natural stone, metal fixture, plastic, fiberglass, and even glass. Shower Saver forms a strong temporary barrier that is designed to sheet water, hard water minerals, soap scum, and other contaminants off the surface and down the drain. It does not “bead water” like typical shower treatments, that leave spots when the water beads dry, but rather is designed to sheet water off the surface, minimizing spotting and build-up. It is designed for weekly use but is safe to use every day. Sheeting action will continue to improve with repeated use

USAGE: Weekly Shower Treatment is safe to use on any surface in the shower. It is safe for all sealed natural stone, acrylic or fiberglass surrounds, metal fixtures and drains of all types, tile, grout, metal frames for doors and especially glass doors .

ADVANTAGES: Weekly Shower Treatment is Hydrophilic which means it sheets water instead of beading. This sheeting action forces water and the minerals and soap scum in it, to run down to the drain taking all the spot causing materials with it. It is safe to use every day but recommended weekly.

LIMITATIONS: Weekly Shower Treatment is not a stand-alone sealer, and should not be used in place of a premium sealer. It is a temporary treatment and must be used on a regular basis for best results.

APPLICATION: To use Weekly Shower Treatment ensure that all the surfaces to be treated are clean and sound. Then simply spray Weekly Shower Treatment liberally on over every surface in the shower and allow treatment to stand for 5-7 minutes. After 5-7 minutes rinse the surface or buff it dry with a paper towel. Each Shower Saver application will last 1-3 weeks depending on the frequency the shower is used.

PRECAUTIONS: Keep out of reach of children. Do not take internally. Avoid contact with eyes. In the event of eye contact rise eyes for 15 minutes with warm water, if irritation persists seek medical attention.

Appearance: Clear to hazy, liquid
Color: Amber
Odor: Mild to none
Odor Threshold (ppm): Not available.
pH (Value): 3.0 +/- 1.0
Melting Point (°C) / Freezing Point (°C): Not available.
Boiling point/boiling range (°C): ~100
Flash Point (°C): Non-combustible
Evaporation Rate: Similar to water
Vapour pressure (Pascal): Similar to water.
Vapour Density (Air=1): Similar to water.
Density (g/L): 1.04 +/-0.02
Solubility (Water): 100% Soluble.
Oxidizing properties: Not oxidizing.
Other information: Not available.

Contact VanHearron, Inc.'s Technical Services for further information or application instructions. Technical service engineers and chemists are available to answer questions on product performance, application methods, and chemical composition.

VanHearron's state-of-the-art protective treatments have developed a reputation by architects and building professionals as the premier solution for construction chemicals. VanHearron is dedicated to solving the destructive influence water intrusion and other elements have on building materials.
